# Statewide Property Tax Revenues Increase 6% in 2005

Utah statewide property tax revenues are expected to surpass \$1.9 billion in CY2005. Your Taxpayers Association bases this estimate on Tax Commission data for assessed valuations and adopted tax rates by all Utah school districts, counties, cities, towns, and special service districts. This estimate includes locally assessed real and personal property, centrally assessed property, and automobile fee-in-lieu (FIL). Automobile FIL accounted for 10.5% of the total.

## Utah Property Tax Growth

### Real and Personal Property

Real and personal property taxes charged for 2005 were \$1.7 billion, an increase of 6.0% over the amount for 2004. Since 2000, real and personal property taxes charged have increased at an annualized rate of 5.8%.

Assessed valuation for real and personal property was \$132.3 billion, an increase of 7.4%. The 2005 statewide effective tax rate on real and personal property was 1.288%, slightly below last year's 1.304% and slightly higher than average since 1999 (1.275%).

### Best and Worst

Every year, your Taxpayers Association lists the five highest and five lowest property tax rates for each type of local government.

When all cities are included (not just the 30 largest), the highest property tax rates are found in East Carbon (0.006243), Salt Lake City (0.005368), Ogden (0.004253), Roosevelt (0.004220), and Brian Head (0.004172). The effective tax rate is 0.002566 for all Utah cities. For the thirty largest cities, the effective tax rate is 0.002854.

In addition to local government fiscal efficiency, other factors impact property tax rates. At the city level, property tax rates are impacted by cities' decisions to impose utility franchise fees. Most urban cities impose this tax while many rural towns do not. City property taxes are also impacted by city sales tax bases, which explain why so many mayors, council members, and city "economic development" directors like to subsidize retail businesses.

### The Best

School District	Tax Rate	County	Tax Rate	Cities (30 largest)	Tax Rate
1. Daggett	0.004091	1. Utah	0.001391	1. Bountiful	0.001194
2. Kane	0.004681	2. Tooele	0.001398	2. Spanish Fork	0.001333
3. Wayne	0.004772	3. Garfield	0.001460	3. So. Salt Lake	0.001396
4. Park City	0.005494	4. Summit	0.001491	4. Riverton	0.001415
5. Grand	0.005596	5. Washington	0.001544	5. Draper	0.001469

School District	Tax Rate	County	Tax Rate	Cities (30 largest)	Tax Rate
Effective Avg.	0.007069	Effective Average	0.002424	Effective Avg.	0.002566

1. Effective tax rate for all cities. For 30 largest cities, the effective tax rate is 0.002854.

### The Worst

School District	Tax Rate	County	Tax Rate	Cities (30 largest)	Tax Rate
36. Beaver	0.008538	25. Millard	0.003861	26. Tooele	0.002698
37. Jordan	0.008655	26. Piute	0.004173	27. Provo	0.002891
38. Tooele	0.008896	27. Weber	0.004284	28. Cedar City	0.003010
39. Tintic	0.008989	28. San Juan	0.004289	29. Ogden	0.004253
40. Nebo	0.009203	29. Emery	0.004416	30. Salt Lake	0.005368

Source: Utah State Tax Commission

School district property tax rates are impacted by enrollment growth rates and assessed valuation per student. Rapidly growing districts with modest to low assessed valuations per student like Tooele, Jordan, Nebo, and Alpine typically have high tax rates.

**County-wide Effective Tax Rates**

County effective tax rates are determined by dividing total real and personal property taxes charged by all tax entities within a county – including school districts, special service districts, and the county itself – by the county’s total assessed valuation.

Valuation-weighted tax rates vary dramatically from county to county for several reasons. Some local governments operate more efficiently than others. Local governments with low property tax bases, which may be due to low property values and/or low population bases, need to provide the same services as counties with high property tax bases.

However, a high tax base does not guarantee a low tax rate. Millard County (county government only) has the fifth highest property tax rate in the state despite having 1.39% of the state’s property tax base (due to Intermountain Power which pays more than 70% of the county’s taxes) and only 0.53% of the state’s population. Salt Lake City has the highest tax rate of any city in Utah despite having 14.6% of the state’s municipal property tax base and 9.2% of the state’s incorporated population.

**County Effective Tax Rates Excluding School Districts**

One measure of local government efficiency in providing non-educational services is to evaluate effective tax rates (ETR) excluding school districts while also accounting for assessed valuation per capita

(AVPC). By excluding school districts, this measure accounts for the tax burdens imposed by counties, cities, and special service districts. The accompanying chart looks at urban and suburban counties in Utah. ETRs are listed along with AVPC. Indexed effective tax rates are calculated by multiplying each county’s ETR by the ratio of that county’s AVPC to the statewide AVPC. Local governments in two counties – Tooele and Utah – have the distinction of having low effective tax rates while also having low assessed valuations per capita.

**County-wide Effective Tax Rates**

County	Effective Rate	% of State Avg	Rank
Wayne	0.743%	57.7%	1
Daggett	0.796%	61.8%	2

Wasatch	0.427%	\$102,470	0.816%
Summit	0.477%	\$238,114	2.121%

Calculations by Utah Taxpayers Association based on Tax Commission and GOPB data

1.County effective tax rates include counties, cities, and special service districts.

2.ETR = effective tax rate

3.AVPC = Assessed valuation per capita

4Indexed ETR = [county ETR] \* [(county AVPC)/(state AVPC)]

**Taxes Charged and Average Rates for Types of Local Governments**

In 2005, school districts collected 54.9% of all property taxes charged, unchanged from 2004. Counties collected 18.8% of all property taxes, also unchanged from 2004. The share collected by cities and towns decreased from 15.4% to 15.1% while the share collected by special service districts increased from 10.9% to 11.2%.

The following table shows the effective tax rates, revenues, and share of total property tax revenues for the four general types of local governments. Effective tax rates are valuation weighted and are determined by dividing real and personal property tax revenues by total property valuation.

**Effective Tax Rates and Taxes Charged for Local Governments**

Gov't Type	Effective Tax Rate <sup>1</sup>	Revenues <sup>2</sup>	Increase over 2004 <sup>2</sup>	Share of Total
School Districts	0.007069	\$1.045 billion	6.0%	54.9%
Counties	0.002424	\$358.4 million	6.0%	18.8%
Cities/Towns	0.002566	\$287.6 million	3.9%	15.4%
Special Districts	0.000387	\$213.3 million	9.2%	10.9%
Statewide <sup>3</sup>	0.012880	\$1.904 billion	6.0%	100.0%

*Calculations by Utah Taxpayers Association*

*1. Effective tax rate is for real and personal property only. FIL is excluded.*

*2. Revenues and percent increase include FIL.*

*3. Rates for school districts, counties, cities, and special service district add to less than the total statewide rate since special service districts have overlapping tax bases.*

**Should Certified Tax Rate Calculation Include Inflation?**

Several Legislators and advocacy groups have proposed allowing local governments to automatically raise tax rates to capture inflationary increases without having to comply with Truth-in-Taxation's notification and hearing requirements.

**If it ain't broke, don't fix it. How much faster do property tax revenues need to increase?**

As the following graphs demonstrate, property tax revenues as a percent of personal income -- after adjusting for property tax cuts unrelated to Truth-in-Taxation -- have actually increased over the past ten years, not decreased. The first graph shows school district property tax collections excluding the statewide basic levy. Basic levy revenues are excluded because the Legislature reduced the basic levy twice during the 1990s and these reductions were unrelated to Truth-in-Taxation. Some but not all of the school district increase can be attributed to recent construction bonds which are exempt from Truth-in-Taxation.

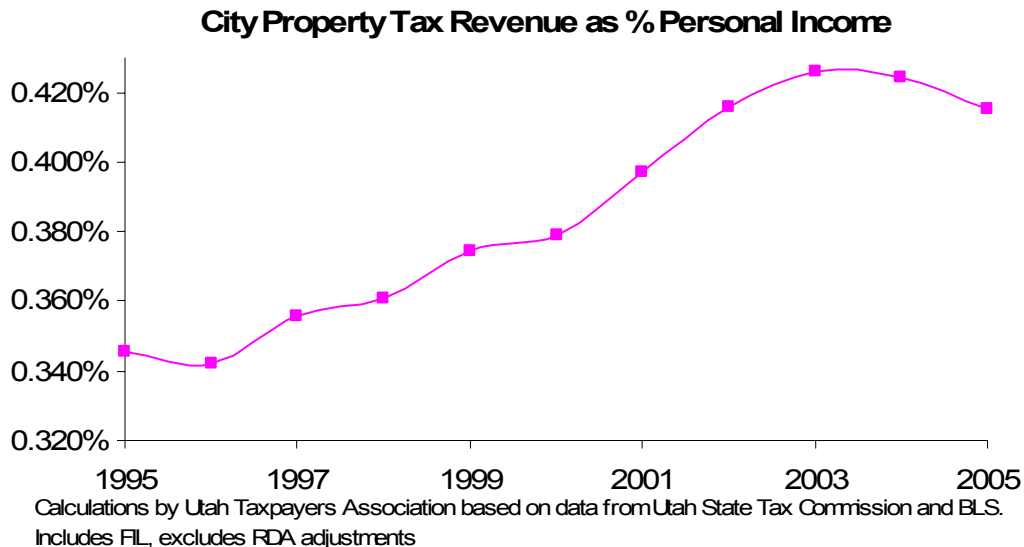

**School Property Taxes excl Basic Levy as Percent Personal Income**

*Calculations by Utah Taxpayers Association based on data from Tax Commission, BLS, and Legislative Fiscal Analyst. Includes FIL, excludes RDA adjustments*

Adjusted property tax revenues have increased as a percent of personal income even during times (2000 to 2004) of modest appreciation in real estate prices.

The second graph shows city property tax collections. No adjustments are needed for the city property tax revenue graph since the Legislature has not passed legislation cutting city property taxes.

**Truth-in-Taxation is not responsible for the revenue shift from property taxes to sales taxes.**

Sales tax revenues *have* increased faster than property tax revenues, but Truth-in-Taxation is not responsible for unnecessarily restricting property tax revenue growth. Several factors explain why sales tax revenues have outpaced property tax revenues.

Property tax revenues have been reduced by nearly \$250 million, roughly the equivalent of 13% of current property tax and FIL revenues, including the following:

- Reduction in county property tax due to imposition of 0.25% county option sales tax which generated \$89.5 million in FY2005.
- The Legislature reduced the statewide basic levy twice during the 1990s. Conservatively, this results in an annual \$160 million reduction.

Sales taxes have increased for several reasons, including rapid increases in personal income and decreased savings.

The Legislature enacted Truth-in-Taxation twenty years, and it has served Utah's taxpayers and local governments well.

## DISTRIBUTION OF PROPERTY TAXES BY TYPE OF TAXING UNIT

YEAR	STATE GENERAL		SCHOOLS		CITIES & TOWNS		COUNTY		ROADS		BOUNTY		SPECIAL DISTRICTS		TOTAL CHARGED
